

# iWALK™

## SMALL BUT STRONG+ LINK™ ME PLUS

### Selling Point

#### Plug and Charge

Built-in connector allows devices be charged simply without any cables, just plug devices into the charging port and charge it.

#### Compact size

Users can put LINK ME PLUS in their pocket without worry about any damages when charging devices.

#### 3300mAh

The LINK ME PLUS is an emergency battery which is used in desperate need of a charge. It's not mean to fully charge your device. With its powerful 3,300mAh capacity, most devices should experience sufficient charge (around 100% for newer iPhones).

#### Pass through

LINK ME PLUS can be recharged while it is charging devices using pass through technology. This allows users to charge their LINK ME PLUS and their device at the same time.

#### Recharging via the same type of connector

The types of charging connector correspond with its input port. Users recharge LINK ME PLUS through their own lightning cable, Micro USB cable or Type C cable.

#### Safety

The protected circuitry and strictly tested lithium battery provides a safe experience to users.
